Years ago, when I was deep into my Orton-Gillingham training, I yearned for cohesive materials that aligned with the skills I learned. But it was challenging! Off-the-shelf programs didn't always fit, so I started creating my own resources - lists of words turned into activities and games, which evolved into tutoring materials and a deck of cards for drills. This eventually led to developing stories that my kids could decode and read fluently. The Complete O.G. was born. Initially, it had 14 resources in September 2014. By June 2016, it grew to 37 resources, with nearly 3,500 pages, and became one of my top-selling resources. It's been a labor of love to create, update, and revise The Complete O.G., seeing teachers and students from around the world use it. However, as The Complete O.G. expanded, it began experiencing growing pains. Teachers Pay Teachers has a file size limit of 200MB per file, so I had to upload some bundles to online storage and provide links for customers to download them. Although this wasn't ideal, I was committed to adding the final resources. Now, I've stopped adding new materials to The Complete O.G., as it's outgrown its original file size limit. Instead, I'll be starting a new bundle, The Complete O.G. Part Two Growing Bundle. If you own the original bundle, please stay organized by logging into TpT, finding this resource, and re-downloading revised versions. Remember to periodically check for revisions, as I frequently update and refine The Complete O.G. To keep your computer from slowing down, consider using online storage like Dropbox. It's a great value at up to 2GB, which is more than sufficient for most people. However, if you're someone who loads up your computer with a lot of clip art and fonts, you may need to upgrade to a paid plan. I also use Carbonite for backup and store files on an external hard drive, which works best for me. If your computer crashes, you can always redownload from TpT using your account. When I was teaching, syncing my classroom computer with my home one helped access files from Dropbox while working remotely. Thinking of sharing your school's Orton-Gillingham resources with multiple users? Don't worry, you can purchase additional licenses at a discounted rate! Just download my free brochure to learn more about it. I also share ways to stay in touch and join a private Facebook group for trained teachers and tutors. As I come up with more ideas for organizing your sound flashcards, I'll add them to this post or create new ones to share with you. Do you have a tip that worked well for you? Share it in the comments! Thanks for reading and purchasing this bundle - I truly appreciate it. This set of sound flashcards is perfect for supporting Orton-Gillingham lessons or solidifying knowledge of specific sound patterns in small groups or one-on-one settings. The bundle includes cards for vowels, consonants, blends, digraphs, and more! It's been updated since 1/29/18, so you can trust it's a valuable resource.
